

FlexDoc Cristal Clear

Working in alignment is ergonomic

 BAKKER ELKHUIZEN

Work Smart - Feel Good

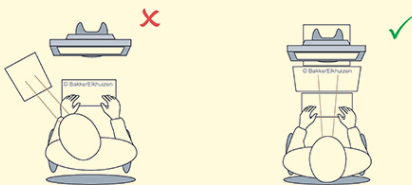

Work with more ease, speed and comfort.

With a document holder you can work in alignment with your keyboard and screen, limiting strain to your neck and shoulders.

Besides reducing physical discomfort, you will also work more comfortably and your productivity will rise.

To prevent neck rotation, documents have to be placed between the keyboard and display screen. A sloping work surface reduces flexion of the neck and thus increases work comfort.

Ergonomic: reduces neck complaints and eye problems. Your work will be easier and faster.

Aligned workstation: the document holder is placed between the screen and the keyboard, preventing unnecessary head and neck motions.

Multifunctional: suitable for fixed as well as flex workspaces.
