FastForward Pro

Vertical ergonomic mouse that takes speed, productivity and control to the next level.

Working with a traditional mouse is like a workout without results. You scroll yourself silly, your wrist twists inwards, your fingers do all the hard work, and you wonder why coffee number 3 isn't helping anymore. All these problems are now a thing of the past.

FastForward Pro is designed for those who have no time to waste. Fly through documents with hyperscroll, switch easily between windows with the productivity button and now also scroll horizontally with the tiltable scroll wheel. This gives you all the tools you need to work quieter, faster and smarter. Like its little brother, the FastForward Pro is designed for long-term use without discomfort. The shape follows the natural position of your hand and wrist, relieving strain on muscles and joints. The silent click ensures you can work with concentration, even in shared workspaces.

Work super-fast with Hyperscroll

Anyone who regularly works with long documents or web pages knows the frustration of endless scrolling. The hyperscroll function in the FastForward Pro solves this problem: with a single turn of the wheel, you can fly smoothly through hundreds of lines of text or countless rows in Excel. Exactly the speed you need to stay focused. Try giving it away after a week.
